## SUBJECT INDEX

### **Apple (continued)—**

juice—  
bacterial life in, 1074  
composition, relation of yeast multiplication to, 314  
concentrates, 315  
vitamin C addition to, 1073, (1087)  
ear hoppers (*Typhlocyba* spp. and others), 112  
magnesium deficiency, 1092, 1255, 1256  
manuring, 344, 749-751, 1183, 1633  
marketing in Los Angeles, 68, (69), 402  
mealybugs, 111, 1292  
measles, 1637  
mildew (*Podosphaera leucotricha*), (429)  
mosaic virus, 1261  
mouldy core connected with *Alternaria* spp., 107  
N, P, K relations in young, 1182  
orchard, renovation of neglected, 1179  
pests—  
in Connecticut, control, 1285  
in Pennsylvania, 110  
photosynthesis affected by root submergence, 55  
pollination, 665, 1173  
polyploidy and winter hardness, 389  
pomace, 1075, 1076  
powder, 1050  
processing, 313, 1574  
pruning, 59, 759, 1095  
quality, assessment of stored, 1035  
respiration, *see also storage*, 391  
ringing, 1095  
root submergence affects photosynthesis, 55

**rootstocks—**  
in Australia, 1630  
for cider varieties, 738  
cold resistant, 383  
dwarfing, 734, 735  
French crab, 736, 1165, 1166, 1168, 1171  
hairy root exhibited by, 1170  
Hibernal, 383  
immune to woolly aphid, 1094, 1291  
in India, 1094  
intermediate, 383, 737, 1168, 1171  
Malling—  
new varieties, 1164  
in U.S.A., 736, 1166, 1169, 1171  
at Vineland, Ont., 1165  
in New Zealand, 344  
resistant to *Rosellinia*, 1094  
Virginia crab, 383, 1168  
**sawfly** (*Holopcampus testudinea*), first appearance in America, 1305  
**scab** (*Venturia inaequalis*), 119, 444, 667, 817, 1095, 1097, 1276, 1277  
**scald**, effect of storage treatments on, 303  
**seedlings** immune to woolly aphid, 797, 1291  
**soil—**  
management, 749  
surveys in Ireland, 1178  
**somatic variations**, 720  
**spraying—**  
affects growth and yield, 443  
to prevent fruit set, 745, 746  
**spray(s)—**  
injury, 95  
residue removal, 124, (125)  
residues, (451)

### **Apple (continued)—**

stem builders, 737  
storage, 302, 303, 1033-1039, 1554-1559, 1630, 1633  
**storage—**  
boron in excess affects, 1038  
at Chaubattia, 1554  
common, in N.S. Wales, 1555  
cooling prior to, 302  
disorders, 1036, 1559  
gas, 304, 344  
of Granny Smith, cold, 1556  
life affected by spraying, 839  
non-refrigerated, 1034, 1555  
quality affected by boron, 1558  
quality affected by cultural practice in Delicious, 1557  
use of dips or waxes in, 1039  
**sucker** (*Psyllia malti*), 1290  
**sunburn**, 1244  
**sunscauld**, 92, 1243  
**syrup**, production of bland, 315  
**tetraploid**, new, from Sweden, 665, 1144  
**tetraploid**, work on, 718  
**thinning of trees**, 762  
**training** by "l'arcure" method, 50  
trees, nitrogen and carbohydrate distribution in, 53  
**varieties—**  
the Close, (727)  
hardy, at Kapuskasing, Ont., 663  
Ingrid Marie, (727)  
Michurin's frost-resistant, 380  
Michurin's, testing, 717  
Reinettes of Krasnojarsk zone, 1149  
for Siberia, a new, 1150  
in the Trans-Urals, new, 1147  
in vicinity of black walnut, unthrifty, 1637  
**vitamin C content**, 38, 39  
**woolly aphid**, immune seedlings and rootstocks, 797, 1094, 1291  
yields from trial plots at East Malling, 1202

### **Apricot—**

disease control, 1280  
growing in Tasmania, 714  
juice processing, (335)  
kernels, debittering, 318  
rootstocks, 740  
wild, in the Alma Ata region, 723

**Arabia Felix** and its drug plants, (267)  
"l'Arcure," a method of training trees, 50

### **Argentina—**

fruit exports and production areas, 769  
Minist. Agric. A.R. hort Dep. 1940, 1091  
possible rubber production in, 1386

**Argyresthia conjugella**, mountain ash a host plant for, 831  
**Argyroloce pruniiana**, 832

Aromatic substances in fruit, 1576

Arrowroot planting and cultivation, 1510

**Arsenate** in soil affects vegetables, lead, 1338  
**Arsenic** injury of peach trees, (845)

**Artichoke**, Jerusalem, sugar from, 333

**Artocarpus integrifolia**, 1509

**Ascochyta** spp. diseases of *Hibiscus* spp., 1031

**Ash** of fruit products, chlorine in, 1585

### **Asparagus—**

planting depth, (231)

**rust** (*Puccinia asparagi*), 186

storage, 1049

### **Asparagus (continued)—**

yields, (1454)

**Association of Applied Biologists**, post-war problems, 1236  
Atchison experiment orchard, Kansas, 59  
**Aurantioideae**, chromosome number in sub-genus *Citrus*, 1463

### **Australia—**

C.S.I.R., A.R. 1941-42, 1630

plant introductions into, 2

recent horticultural research, 1246

### *Autographa brassicae*, 514

**Auxin**—*see also Growth substances*  
extraction from plant tissues, 10  
mechanism of action, 9, (676)  
in seedlings from X-rayed seed, (367)  
transport in woody stems, (367)

### **Avocado—**

breeding, (998)

decline and dieback, 266, 551

flower bud differentiation, 570

fruit anatomy, 995

fruit, woodiness in, 994

germination facilitated by removal of seed coat, 993

mites, 996

nitrogen requirements, 992

pollen germination, 1498

preservation, plio-film wraps for, 1047

soil management, 997

storage, gas, 1565

Azalea leaf and twig blight, 1458

Azotobacter—respiration study, 700

### **Bacteria—**

in apple juice, 1074

causing plant disease, 1266

### **Bacterial—**

diseases in Portugal, 1267

plant pathogens, names for, (1270)

soft rot of tomato, 1434

Bactericides, metal soluble salts as, 102

### **Bacterium—**

*angulatum*, (231)

*solanacearum*, 483

*tabaci*, (231)

*tumefaciens* inoculations, (219)

*Balanites roxburghii*, oil from fruit, (1620)

Baluchistan, fruitgrowing in, 1026

### **Banana—**

car fumigation with HCN, 1564

carbohydrate metabolism during storage, 629

*Clitocybe* root rot, (294)

genetics in relation to breeding, 1032

leaf spots (*Cercospora musae* and *Mycosphaerella musicola*), 291-293, 617, 669

Panama disease (*Fusarium oxysporum cubense*), 291

research at I.C.T.A. Trinidad, 291

storage, 629

the Topocho, resistant to *Cercospora musae*, 669

*Bandakka* (*Hibiscus esculentus*) mosaic, 622

Bark splitting, greasebanding and, 441, 442

Basic English for science, 1623

Basutoland Dep. Agric. A.R. 1941-42, (1100)

### **Bean—**

*aphis* (*Aphis fabae*), 530

assimilation on nitrogen and saline solutions, (1454)

## SUBJECT INDEX

**Bean (continued)**  
 beetle, Mexican (*Epilachna varivestis*), 531  
 canned, analysis, (1620)  
 cultivation in Suffolk, winter, 1447  
 diseases, 529, (623)  
 dried, vitamin C content, 1064  
 garden types, 528  
 growing—  
     in Idaho, Washington and Oregon, 223  
     in Victoria, Aust., field, (225)  
 growth substances and seed, 673  
 light affects growth and nutrition, (225)  
 lime—  
     growth affected by insecticides in soil, 440  
     *Heliothis armigera* damage, 1443  
 navy, plot technique, 220  
 platinum chloride effect on, 208  
 rust (*Uromyces appendiculatus*), 1448  
 seed—  
     dusts for protecting against weevil, 224  
     heteroauxin and, 673  
 snap—  
     foliar diagnosis, 222  
     growth and quality, (1454)  
     storage, 1048  
     U.S. No. 5 Refugee, 221  
     vitamin C in, 1048  
 virus resistant, 529

**Bees**—  
 apparatus for recording entry to and exit from hive, 386  
 diseases, 1175  
 experiments, design and interpretation, 1175  
 orange nectar and pollen and, 547  
 as peach pollinators, 742  
 in pollination, usefulness in, 51  
 repellants, 1175  
 spray danger, 1175, 1176

**Beet**—  
 boron deficiency and breakdown, 505, 506, 1390  
 planting methods, (1391)  
 seed production, 1394  
 syrup from table, 1079  
 varieties, American red garden, 132

**Berebere tree (*Milletia ferruginea*)**—  
 rote none in seeds of, (578)

**Bibliography on wine, American**, 661

**Biennial bearing in apples**, 1191

**Biochemistry, Annual Review**, 1629

**Biological control**—  
 of cactus, (267)  
 of insects, 660

**Biologists' post-war problems**, 1236

**Bios components of plants, factors affecting**, 15

**Bitter pit**, 379, 421, 1258, 1259

**Blackberry**—  
 mosaic on, 154  
 stamen blight (*Hapalosphaeria deformans*), 821  
 varieties, Merton Thornless, 665

**Black currant**—  
 growing in England, 406  
 pests, 431  
 syrup, 1078  
 variety trials in Finland, 405  
 vitamin P content, 322

**Blueberry**—  
 cane canker (*Physalospora corticis*), 428

**Blueberry (continued)**—  
 cultivation, 74, 75, (1211)  
 cultivation media, 72, 76  
 cuttings, 73, 1210  
 dehydration, (1067)  
 diseases, 1281  
 growth substances and, 72  
 identification by leaf, 77  
 inherited characters, 78  
 photoperiod influences, 76  
 research in Washington State, 671  
 rest period requirements, 1209  
 selection in West Virginia, 1637  
 soil media, 76, 778  
 storage, 306

*Boehmeria nivea*, 1508

*Boga medeola* as shade for tea, 343

*Boma* plateau, one home of *Coffea arabica*, 276

**Border trees, relative yields**, 1201

**Boron**—  
 absorption by soya bean, (227)  
 and apple storage quality, 1558  
 content of forage and vegetable crops, 855  
 deficiency—  
     in beet, 505, 506, 1390  
     in cabbage, 187, 506  
     in celery, (231)  
     in mangold, 667  
     in pear, 420  
     relation of plum gumming to, 1257  
     in rutabagas, 667  
     in sugar beet, 505, 887  
 determination of minute amounts, 1137  
 excess affects apple storage quality, 1038  
 in Hawaiian soils, 1632  
 sunflower affected by, 497

**Botanic Gardens, Peradeniya, Royal**, (576)

**Botany, taxonomic, dynamic approach to**, 1127

*Botrytis cinerea* in apple, 1275

**Bracken**—  
 chlorosis due to manganese deficiency, 16  
 removal and control, 436

**Brassica**—  
*alba* and *nigra*, 493  
 crops, origin and relationship of, 906  
*oleracea*, heteroauxin and production of tetraploid shoots in, (33)  
 seed production, 135

**Breeding**—  
 apples for hardiness, 1145, 1148, 1150  
 avocado, (998)  
 carrot, 1096  
 deciduous fruit, 1143  
 environment effect on hereditary factors in relation to, (1138)  
 for hardiness in U.S.S.R., 1146-1151  
 musk melon, 196  
 potato, 1096  
 for resistance to pests and diseases, 795  
 small fruit in Siberia, 1207  
 strawberry, 796, 1213  
 tomato, 216, (219), 1096  
 vine, 782, (1227)

*Brevicoryne brassicae*, 189, 1350, 1407

Bridge grafting, 729

**British Guiana, Dep. Agric. Rep.** 1942, (1638)

**British Guiana, Dir. Agric., Administ. Rep.** 1941, (347)

**British Honduras**—  
 Dep. Agric. A.R. 1941, (1100)  
 vegetation, (1553)

**British West Indies, Central Sugar Cane Breeding Station, Barbados, A.R. 1940-41**, (672)

**Broccoli**—  
 mosaic, 189  
 variety trials in Scotland, 515

**Broomrape (*Orobanche ludoviciana*)**—  
 parasitic in tomato, 938  
 physiological aspects of sunflower resistance to, 496

**Broussonetia papyrifera** a source of fibre, 160

**Browning system in dried apples, inactivation**, 1597

**Bud, axillary, determination of**, 7

**Budding**—  
 after care, 381  
 kaki, 48

**Buffalo berry (*Shepherdia argentea*)**, a dry-land fruit, 777

**Buffalo berry (*Lepartyrea argentea*)** source of vitamin C, 408

**Bulb**—  
 eelworm (*Ditylenchus dipsaci*), 242  
 hot water treatment, 539

**Bulletin of dry sub-tropical crops (Russian)**, 1485

**Bursaria spinosa**, recovery of aesculin from, 1618

**Butters, fruit**, 1083

**Cabbage**—  
 boron deficiency, 187, 506  
 caterpillar control, 514  
 fasciation in, 1407  
 fertilizers, phosphatic, 459  
 fly (*Hylemyia brassicae*) and control, 861, 920, 1405  
 growing and marketing in New York, 1406  
 manuring of spring, 919  
 starter solution experiments, 1421  
 varieties, American, 132

**Cacao**—  
 cultivation in Nigeria, 598  
 cuttings, shading affects, 282  
 improvement—  
     in Cameroons, 286  
     in Trinidad, 597  
 manurial trials, preliminaries to, 278  
 pollination, 281  
 rehabilitation in Trinidad, 280  
 research in Trinidad, 668  
 selection on Gold Coast, 1522  
 shade for cuttings, 282  
 soil aeration, (287), (601), (1016)  
 swollen shoot virus, 1525  
 thrips (*Selenothrips rubrocinctus*)—  
     light affects incidence, 285, 668  
     resistance, 1528  
 twinning seedling, 283  
 uniformity trials, 278  
 vegetative propagation, 1523  
 water supply, (1016)  
 wilt investigations in Trinidad, 599  
 witches' broom (*Marasmius perniciosus*), 284, 600, 668, 1526, 1527

yield, effect of age of field on, 1015  
 yield, factors affecting, in Grenada, 279

**Cactus, biological control**, (267)

**Caesalpinia coriaria** a source of tannin, 1531

## SUBJECT INDEX

- Ajanus cajan*, a disease of, 866  
 calcium in vegetable juice, 323  
 salines in X-rayed seed, (367)  
 Cameroons, improvement of cacao, oil palm and rubber in, 286  
 Canada—  
     Minister of Agriculture for Dominion, A.R. 1941-42, 662  
     scientific and technical societies, 339  
 Canned fruits and vegetables, vitamin C content, 324, 1610  
 Canning—  
     fruits, 1071  
     at home, 1071, 1611  
     peas, 651  
     tinplate and blackplate investigations, 1609  
 tomatoes, 332  
     vegetables, 325, 326, 1071  
 Cantaloupe leaf spot, 923  
*Capsicum annuum*—  
     ascorbic acid content, 491  
     as ornamental, 492  
*Capsicum frutescens* mosaic, (1032)  
*Capsicum* growing in Morocco, 898  
 Carbohydrate(s)—  
     in apple trees, nitrogen and, 53  
     content related to protein synthesis in leaves, 691  
     molecular equivalence to CO<sub>2</sub> in photosynthesis, (697)  
 Carbon—  
     disulphide vapour as herbicide, (129)  
     estimation in plant tissue, (1138)  
     tetrachloride fumigation, 1571  
 Cardamom cultivation in South India, 288  
 Carnation—  
     nutrition, 233  
     photosynthesis affected by light intensity, 232  
     thrips control, 1455  
 Carob (*Ceratonia siliqua*), cauliflory in, 352  
 Carotene—  
     in carrot, 908  
     determination, (375)  
*Ribes aureum* a source of, 71  
 in sweet potato, 262  
     in vegetable juice, 323  
*Carpocapsa pomonella*, see Codling moth  
 Carrot—  
     breeding, 1096  
     carotene content as basis for breeding, 908  
*Cercospora* blight, 910  
 Chantenay, quality and relation to seed production, (231)  
 fertilizers, phosphatic, 459  
 fly (*Psila rosae*) control, 183, 920, 1405, 1633  
 glasshouse varieties, 1339  
 growing in England, 907  
 juice and treacle, (1087)  
 manuring, 909, 919, 1095, 1395  
 root shape affected by manuring, 1395  
 rust fly, *see* fly  
 seed production, 137, 1394  
 seed stalk development, 1393  
 seedling blight (*Alternaria radicina*), 911  
 soft rot, 860  
 varieties, American, 132  
 vitamin A in, 330  
 Cassava—  
     growing—  
         in Amazon valley, 272  
     Cassava—growing (continued)—  
         in tropics, 1010  
         leaf spot (*Cercospora* spp.), 586  
         meal preparation, 272  
         mosaic in relation to sowing date, 1636  
         starch, Nigerian, 654  
*Castilla elastica*, 173, 175, 608, 1543  
 Castor oil (*Ricinus communis*) manuring, 900  
 Cation-anion balance, role of ether-soluble organic acids in, (690)  
 Cauliflory in carob, 352  
 Cauliflower, virus in, 188  
 Cawthon Institute, A.R. 1941, 1092  
*Ceara* rubber (*Manihot glaziovii*), 1386  
 Cedar-apple rust (*Gymnosporangium juniperi-virginianae*), 1277  
 Celery—  
     deficiency symptoms, (231)  
     mosaic, (231)  
 Cells, palisade, elongation, 6  
 Cellulose possibilities in West Africa, 1505  
 Celodal as plant preservative, 29  
 Celtuce, a new vegetable, 516  
 Census of English fruit farms, a plea for, 1141  
 Central Europe, economic plants of, 903  
*Cephaelous parasiticus*, 275  
*Cephalosporium lecanii*, a scale-controlling fungus, 1012  
*Ceratitidis capitata* on papaw, 1497  
*Ceratostomella radicicola* on date palm, (264)  
*Cercospora*—  
     carotae, 910  
     musae, 291-293, 617, 669  
     nicotianae, 588, 891  
     spp. causing cassava leaf spot, 586  
 Cerium in pea nutrition, 535  
 Certification—  
     of horticultural materials in U.K., 1140  
     of sprays—  
         in New Zealand, 1309  
         in Switzerland, 1310  
 Ceylon—  
     coconut and coir industries, 1619  
     Dir. Agric., Administ. Rep. 1941, (672)  
     foodstuffs, analysis, 587  
 Chamber—  
     air conditioned, experimental, 1106  
     refrigerated plant culture, 30  
 Chaulmoogra oil in Ceylon, 603  
 Chayote (*Sechium edule*), 621  
 Chemistry, Russian agricultural, 1  
 Chemotherapy of tree diseases, 118, 801, 802  
*Chenopodium*—  
     *amaranticolor* as a vegetable, 180  
     *ambrosioides* L. var. *anthelminticum*, 168  
 Cherimoya (*Annona cherimola*)—  
     cultivation in N.S. Wales, 990  
     research in California, 987  
 Cherry—  
     bacterial canker (*Pseudomonas mors-prunorum*), 102  
     banded chlorosis virus, (101)  
     *Cylindrocladium* shoot wilt in layers, 1279  
     dehydration, 1060  
     distinguishing characters of sweet, acid and Duke, 1156  
     fly (*Spilographa cerastis*) in Sweden, 1295  
     grafting, 1159  
     hybrids, 42  
 Cherry (continued)—  
     incompatibility, 665  
     leaf spot (*Cocomyces hiemalis*), 819  
     manganese deficiency control, 1253  
     Mazzard, excessive rooting at collar, 1245  
     orchards, soil moisture in, 397  
     pests, 431  
     pollination, 665  
     rasp leaf, 99, 1263  
     storage, gas, 1560  
     the Ural acid, 1155  
     yellows, (101)  
 Cheshunt experimental results in 1942, 1339, 1340  
 Chestnut, self-sterility in Chinese, 1235  
 Chicory cultivation, 922  
 Chillies, cultivation, 1529  
 Chlorides, peach response to high, 1185  
 Chlorine in ash of fruit products, 1585  
 Chlorophyll—  
     a and b, their ultra-violet absorption spectra in ether solution, 1128  
     in the chloroplast, 1130  
     concentration, determination, 26  
     -protein complex in legumes, (697)  
     -protein compound of green leaf, 1129  
 Chloropicrin for eelworm control, 217  
 Chlorosis—  
     in cherry, control, 1253  
     due to various causes, 94  
     of fruit trees, 804, 1250  
     iron deficiency, 1547  
     lime induced, 804  
     in *Macadamia*, 1547  
     in tomato, 209, 1429  
     in vine, 805, 1250, 1251  
 Choco (*Sechium edule*), 621  
 Christophine (*Sechium edule*), 621  
 Chromosomes and vitamin content, 236  
 Chrysanthemum midge (*Diatrachomyia spp.*), 948, 1457  
 Chrysil, a rubber from *Chrysanthemum nauseosus*, 1379  
*Chrysanthemum* spp. rubber plants, 499, 1379  
 Chuco (*Sechium edule*), 621  
 Cider apples, rootstocks for, 738  
 Cinchona—  
     cultivation—  
         in India, 1532  
         in Portuguese colonies, 1534  
     production, 1018, 1532, 1534  
     from seed, 1533  
 Citrange, seed and seedling yields, 1466  
 Citrus—  
     brown rot (*Phytophthora parasitica* and *citrophthora*), 254, 257, 552  
     chromosome numbers, 1463  
     classification, Swingle's new, 957  
     collar rot (*Phytophthora citrophthora*),  
         *see also* foot rot, 255, 256, 974  
     decline—  
         due to soil nitrates, 1474  
         in Murrambridge Irrigation Area, 256  
         relation of root injury to, 551  
     erosion in Californian orchards, 1477  
     false codling moth, (982)  
     foot rot (*Phytophthora parasitica*), 973  
     frost—  
         damage in Argentina, 550  
         protection, various methods, 549  
 fruit—  
     *see* fly control, 977

## SUBJECT INDEX

- Citrus—fruit (continued)**  
 set not increased by growth substances, 1465  
 fumigation, *see also* scale, (260), 558-560, (562), 979, 1481, 1482  
 fungal infection, 254  
 growing—  
     in Ceylon, manual, 658  
     in tropics, 958  
     in United Provinces, India, 542  
 gummous, *see also* brown rot, 552  
 hybrids used as rootstocks, seed production, 1466  
 irrigation, 971  
 manuring, 1470-1472, 1475  
 manuring, potassic, 1182  
 mottle leaf, 1246  
 nematode (*Tylenchulus semipenetrans*), 553, 980, 981, (1484)  
 nitrogen starved, failure of vetch grown with, to excrete nodule nitrogen, 1473  
 oil sprays, 554  
*Penicillium* moulds, 1046  
 pests, 258  
 phosphorus deficiency, 249  
*Phytophthora* spp. infection, 254-257, 551, 552, 973, 974  
 planting out, 970  
 psoriasis, 252  
 pulp as cattle food, 334  
 pythaceous fungi on, 253  
 red mite (*Paratetranychus citri*), 561, (562)  
 rootstocks, 256, 344, 543, 1094, 1466-1468, 1630, 1632, 1633  
 scale—  
     black (*Saissetia oleae*), 559, 562, 978  
     control, 556-560  
     control, biological, 556  
     parasites, 978  
     purple (*Lepidosaphes beckii*), magnesium deficiency affects, (562)  
     red (*Aonidiella aurantii*), (260), 558, (562), 1478-1481  
 seed storage, 1563  
 snail (*Helix aspersa*), 563, 564  
 sulphur—  
     deficiency, 250  
     dust injury, 1483  
 thrips, 259, 555, 557, 976  
 woods, chemical constituents, (260)  
 wraps, 1046  
**Cladosporium**—  
*cucumerinum*, 520  
*fulvum*, 212, (219), 1440  
 herbarium, 662  
 Clamps to adjust branch growth, 1187  
**Clasterosporium carpophilum**, 426  
 Climate—  
     and deciduous fruit growing, 34  
     effect of irrigation on, 705  
     and man, U.S. Dep. Agric. Yearb. 1941, 338  
 and sugar cane and beet, (131)  
 and tobacco, (131)  
 and vegetable crops in U.S.A., 130  
**Clitandra orientalis**, a rubber plant, 1025  
**Clitocybe** root rot of banana, (294)  
 Clove field trials, criterion of results, 602  
**Clubroot** (*Plasmopiphora brassicae*), 460, 461, 860, 1408  
**Cnidoscolus marginatus** source of drying oil, 1017  
 Coal from material of recent origin, (1620)  
**Coca** (*Erythroxylon coca*), 1535  
**Cocomyces hemialis**, 819  
**Coccus viridis**, 1012  
 Coconut—  
     fruit changes during growth, 616  
     husk ash as fertilizer, 1549  
     industry in Ceylon, 1619  
     manuring, 1093  
     Res. Scheme Ceylon A.R. 1941, 1093  
     stem bleeding, physiological, 1550  
 Coding moth (*Carpocapsa pomonella*)—  
     in Argentina, (845)  
     biology in Baluchistan, 1297  
     control, 434, 435, (451), 828-830, 1296-1302, 1633, 1637  
     nutrition affects development, 113  
**Coffea arabica**—  
     var. Bourbon, 595  
     improvement in São Paulo, 595  
     root growth, 1013  
     in Sudan, 276  
 Coffee—  
     A.R. plant pathologist (Coffee Services) Kenya 1942, 1519  
     Antestias damage and control, 594, 1519, 1636  
     cherry husk not a cure for malaria, 1521  
     classification of early crop, 1011  
     cuttings, 1635  
     growing—  
         in Haiti, 277  
         in India, 1515  
         in Kenya, west of the Rift, 594  
         in São Paulo, Brazil, 1517  
         in Venezuela, 1516  
     mealy bug, 1014  
     mulching, 1635  
     multiple stem, converting to, 1518, 1635  
     pruning, 1635, 1636  
     pulpers, maintenance, 1520  
     research—  
         in Hawaii, 1632  
         at Scott Laboratories, 1519  
         station, Lyamungu, Moshi A.R. 1942, 1635  
         in Uganda, 1636  
     scales, relation of ants to, 1012  
     selection, 593, 594  
     shade trees and nutrition, 1636  
     shading in Latin America, 596  
     tree recording, 593  
 Coir industry in Ceylon, 1619  
 Colamine as growth substance, 364  
 Colchicine—  
     application technique, 371  
     induces polyploidy, 32, (33)  
     induces tetraploidy in tomato, 201  
     treatment, 1102  
 Collards, insecticides for use on, 1350  
**Colletotrichum**—  
*atra mentarium*, 1436  
*lagenarium*, 520  
*lini*, 881  
 Colour in fruit affected by sodium thiocyanate, 346  
**Comperiella bifasciata**, 557, 978, 1478  
 Composition—  
     of peach fruit, variation during development, 390  
     of plants—  
         altitude affects chemical, 360  
         micro-incineration to determine, (375)  
 Compost—  
     investigations at Macaulay Institute, 368  
 John Innes, 665  
 making—  
     changes in organic matter in heaps, 60  
     from Napier grass, 580  
     from sugar cane refuse, 1009  
     for vegetable and flower growing, 61  
**Conotrachelus nenuphar**, 433  
**Convolvulus arvensis**, root development, 692, (836)  
 Co-operative marketing of fruit and vegetables, (403)  
 Copper—  
     deficiency in tung, 1494  
     sebacate, seed protectant, 464  
 Cordon cultivation of apples and pears, 49  
 Cork oak in the Americas, possibilities, 1108  
**Coryneum bejerinckii** control, 108, 1280  
**Cosmos**, effects of application of thiamine to, (676)  
 Costa Rica, establishment of Inter-American Institute of Agricultural Science in, 268  
 Cotton growing in Bulgaria, possibilities, (886)  
 C.S.I.R. Australia, A.R. 1941-42, 1630  
 Cover crops—  
     orchard, (753)  
     for peaches, 667  
     for tung, 1489  
     for vines, 781  
 Cranberry—  
     flooding, damage incurred during, 1242  
     glades in W. Virginia, (785)  
     growth and fruiting, 82  
**Cremogaster** sp. as cacao pollinator, 281  
**Cronartium ribicola**, relations of red currant to, 822  
 Crop recording, labour economy in, 1204  
 Crops and cropping in United Kingdom, 1626  
 Crown gall inoculations, (219)  
 Crucifers, mustard oils and clubroot in, 1408  
 Cryolite injury to tobacco seedlings, 1366  
**Cryptostegia** spp. rubber plants, 499, 1542  
 Cucumber—  
     diseases of glasshouse, 520  
     leaf curl virus, (947)  
     pollination, 198  
     preserving, oil dips for, 309, 310  
     seed extraction, 1417  
     seed and shoots, low temperature treatment, 1414  
**Cucurbitaceae**—  
     discussion on, 519  
     fruits of tetraploid, (947)  
     hybrid vigour, 1416  
 Currants—  
     black and red, *see* Black and Red currants  
     buffalo (*Ribes aureum*), 71  
 Custard apple, *see* Cherimoya  
 Cuttings—  
     effect of cutting at different angles, 12  
     fruit tree—  
         propagation by hardwood, 1162, 1163  
         rooting, 730  
**Perilla nankinensis**, 382  
 rooting—  
     depends on stage of growth of mother plant, 382

## SUBJECT INDEX

- Cuttings—rooting (*continued*)—  
    affected by maturity and treatment of  
        mother plant, 11  
    soya bean, 382
- Cyclamen mite on cyclamen, hot water  
    treatment for, 1459
- Cydia pomonella*, see Codling moth
- Cylindrocladium scorpiarium* in plum and  
    cherry layers, 1279
- Cyperus rotundus* eradication, 582
- Cypohandra betacea*, 571
- Cyprus Dir. Agric. A.R. 1941, (347)
- Cytological technique, (31)
- Dacus oleae*, 1294
- Daffodil fly (*Merodon equestris*), 1461
- Daghestan, wild fruit trees in, 722
- Dandelion—  
    Russian, *see* Kok saghyz  
    seed storage, 1562
- Darkness affects nutrient solution effects  
    in maize seedlings, (697)
- Date palm—  
    bearing affected by leaf area, 568✓  
    bunch thinning, 1496✓
- Ceratostomella radicum* on, (264) ✓
- Deglet Noor—  
    anatomy of fruit, 999✓  
    grading, 569✓
- fruit shrivel, 1496✓
- leaf elongation, 1495✓
- in Morocco, 263✓
- Datura* spp., harvesting and drying leaves,  
    171
- Datura stramonium* grafting with tomato,  
    (219)
- Day length effect on vegetable growth, 856
- Deficiencies in plants, mineral, a manual  
    on diagnosis of, 1089
- Deficiency symptoms—  
    boron, 187  
    copper, 1494  
    iron, 1547  
    magnesium, 805, 1092, 1255  
    manganese, 803, 1247, 1253, 1254, 1492  
    mineral, diagnosis, 799, 800, 1089, 1248  
    in pecan, 1249  
    in potato, 151, 152  
    phosphorus, 249, 1225, 1252  
    potassium, 1493  
    soil, 93  
    sulphur, 250  
    sulphur, in black mustard, 494  
    in tea, 1513  
    various, 1246, 1247  
    in vine, 1225, 1246  
    zinc, 295, 1247
- Dequelin separation process, (578)
- Dehydrated foodstuffs in tropics, 647
- Dehydration, *see also* Drying—  
    Dehydration—  
        of food in wartime, 312, 1051  
        of fruit, 646, 1052, 1593, 1596  
        of guava, 1062  
        of olive, (1067)  
        of potato, (1603)  
        powdered vegetable, 1065  
        principles, 1592, 1593  
        prune, 1598  
        vegetable, 646, 1052, 1592-1595, 1599  
        and vitamin content, 645, 646, 1582
- Deli Tobacco Experiment Station, Medan,  
    Sumatra, work of, 588
- Delia antiqua*, 511, 861, 1402, 1405
- Delphinium diseases, (246), 949, 950
- Derris—  
    diluents for pure ground root, 1348  
    production in Venezuela, 577  
    rotenone determination in, 447, 448,  
        1319-1322
- Dew persistence, 1103
- Diagnosis by plant analysis, (1182)
- Diarthronomyia* spp., 948, 1457
- Dictionary of the fungi, 1621
- Didymella lycopersici*, 527, 1441, 1442
- Dietetics in Hawaii, 269
- Digitalis purpurea* cultivation in New  
    Hampshire, 172
- Diplodia*—  
    *cajan*, 866  
    *natalensis*, 552
- Diseases(s)—  
    in Argentina, plant, (1238)  
    control of fungous, 583  
    of crops—  
        at the I.C.T.A., Trinidad, 1005  
        in São Paulo, Brazil, 1006  
    of economic plants in Canada, check  
        list of, 1627
- of fruit in Kent, 1271
- of fruit trees, Swedish manual, 419
- of fruit, German manual of pests and,  
    794
- of horticultural plants, seed borne,  
    425
- in Jamaica, plant, 581
- in N.S. Wales, new plant, 792
- in S. Rhodesia, plant, 1499

## SUBJECT INDEX

- Incas, coca, the divine plant of the, 1535  
 Incompatibility in *Linum grandiflorum*, physiology of (690)  
 Indian Tea Ass. sci. Dep. A.R. 1941, 343  
 Indicator plants, food crops as, 1503  
 Infiltration determinations, reduction of error in, (1138)  
 Injection—for disease control, 118, 801, 802  
 Insect(s)—  
     seen in England in 1942, 1284  
     toximeter, 126  
 Insecticidal plants—see also particular plants—  
     *Thevetia neriifolia*, 127  
     in Venezuela, 577  
 Insecticides, see Sprays, insecticides  
 Institute, inter-American, in Costa Rica, 268  
 Ipu nui (*Lagenaria siceraria*), 1030  
*Iridomyrmex humilis*, (562)  
 Iris, bearded, in Texas, (541)  
 Iron—  
     deficiency, 1547  
     manganese relation in plant metabolism, 226  
     in plants, (375)  
     wood (*Ostrya virginiana*) seeds, (697)  
 Irrigation—  
     of deciduous orchards, 396, 754, 1098, 1192  
     effect on climate, 705  
     for field crops, 754  
     leaf diagnosis in relation to, 222  
     salt accumulation under, 784  
     of vines, 83  
 Irrigators, auto-irrigators, 699  
 Ivy, poison (*Rhus toxicodendron*) control, 1306  
  
 Jack fruit (*Artocarpus integrifolia*), food value of seeds, 1509  
 Jam making, domestic, 1611  
 Jamaica, vegetation of, 1553  
 Japanese beetle (*Popillia japonica*), 1351, 1352  
 Jelly making at home, 1611  
 John Innes Institute A.R. 1942, 665  
 Juice—  
     apricot, (335)  
     fruit—  
         home manufacture and use, 1070, (1087)  
         production, 652, 1072, 1077  
         production in Sweden, 1072  
     peach, (335)  
     small fruit, 1077  
     tomato, 1081  
     vegetable, 652  
     vitamin C addition to, 1073  
 Jute—  
     cultivation in Colombia, 1508  
     stem-rot disease, 1553  
     substitutes, *Urena lobata*, 584  
  
 Kaki—  
     growing in Europe, 44  
     research in California, 987  
     tannin cells, varietal differences, 56  
     vegetative propagation methods, 48  
 Kale cultivation, 917, 918  
 Kapuskasing agric. exp. Stat. Rep. 1936-40, 663  
  
 Kok saghyz (*Taraxacum kok saghyz*)—  
     cultivation, 500, 671, 1378, 1380  
     eelworm pests, 1383  
     in Great Britain, 174, 1378  
     leaf morphology, 501  
     manuring, 1381  
     in New Zealand, possibilities for, 500  
     nutrition, 502-504  
     radioactive elements in nutrition affect, 502  
     rubber content, 1382  
     seed germination stimulation, 904  
     storage affects rubber content, 1382  
     trials, 173  
 Koro seal gas-tight fabric, 1482  
 Kremenskaja field station, 708  
 Krim saghyz (*Taraxacum megalorrhizone*)  
     cultivation, 1378  
  
*Lagenaria siceraria*, 1030  
*Landolphia* spp. rubber plants, 1025, 1541  
 Lanthanum in pea nutrition, 535  
 Larkspur, virus diseases, 951  
 Lawn mowings as pig food, (1138)  
 Leaf—  
     analysis as guide to soil sterility, 372  
     beets and spinach, 1404  
     chlorophyll-protein compound of green, 1129  
     diagnosis in relation to irrigation, 222  
     growth affected by light, (20)  
     hopper injury, photosynthesis and transpiration, 112  
     measurement, 1495  
 Leek, weed control by sulphuric acid, 513  
 Legume—  
     cultivation, 939  
     seed inoculation, 942, 946  
 Leguminosae, root nodules of, 1120  
 Lemon—  
     Eureka, anatomy and histology, (545)  
     storage, 627, 628  
*Leparyrea argentea* source of vitamin C, 408  
*Lepidosaphes beckii*, (562)  
 Lettuce—  
     diseases, 860, 1410  
     manuring after soil treatment, 194  
     nutrition, 194, 195  
     root aphis (*Pemphigus bursarius*), 1411  
     seed—  
         colour inheritance, (1412)  
         driller and fertilizer distributor, 193  
         viability, storage conditions and, 1409  
     seedlings, growth substances and, 518  
     varieties, 191, 921, 1339  
     vernization, 192, 517, 1630  
     in water cultures, 204, 205  
*Licania rigidia* pests, 605  
 Light—  
     effects of different coloured, on growth, (20)  
     excessive, effect on tomato, 210  
     recorder for field use, (375)  
 Lignin in citrus woods, (260)  
*Ligustrum japonicum* berries as poultry food, 538  
 Lily, Easter, bulb treatment, 955  
 Lime—  
     and mosaic infection in tomato, 1431  
     rootstocks for West Indian, 546  
 Limestone, dolomitic, effects, (23)  
 Liming—  
     affects phosphorus transformation in acid soils, 1007  
     soft fruits, 412  
 Linseed—  
     cultivation—  
         in England, 498  
         in New Zealand, 1376  
     seed treatment, 1377  
*Linum grandiflorum*, physiology of incompatibility in, (690)  
 Lipositol in soya bean, (702)  
 Liquids, flow of, 1308  
 Little leaf, 1225, 1246  
 Locust control, 572  
 Loquat—  
     crown rot (*Phytophthora cactorum*), 105  
     *Entomosporium maculatum* on, 103  
     growing in Algeria, 989  
     research in California, 987  
 Lucerne as a human food, 848  
 Lyamungu, see Moshi  
  
*Macadamia ternifolia*—  
     chlorosis due to iron deficiency, 1547  
     grafting, 1632  
     oil formation and accumulation, 612  
 Macaulay Institute, compost investigations, 368  
  
*Macrosiphum*—  
     *pisi*, 1451  
     *sarcinaeforme*, toxicity of thiram compounds to, 444  
 Magnesium—  
     availability in different carriers, 667  
     deficiency—  
         in apples, 1092, 1255, 1256  
         in citrus, (562)  
 Malaria, coffee cherry husk not a cure for, 1521  
 Mallee soils, salt accumulation in, 784  
 Manganese deficiency—  
     in bracken, 16  
     control, 803, 1253  
     in tung, 1492  
 Mango—  
     budding, 1028, 1546  
     dry weight determination, 653  
     grafting, 611, 1027  
     kernels as food, 1617  
     quick freezing, 1632  
     squash manufacture, 1606  
 Mangold, Rothamsted experiments, (947)  
 Mangrove, pneumatophore, function, 523  
*Manihot glaziovii*, a possible rubber plant, 1386  
*Manihot utilissima*, see Cassava  
 Manual—  
     Basic (English) for science, 1623  
     biological control of insects, 660  
     citrus growing in Ceylon, 658  
     crops and cropping, 1626  
     deciduous fruit growing, 336  
     diagnosis of mineral deficiencies in plants, 1089  
     diseases of plants, for fruitgrowers (Swedish), 419  
     diseases of vegetables, 657  
     mushrooms, edible, 1622  
     olive production, 1628  
     pests and diseases of fruit (German), 794  
     phytopathology (Italian), 793  
     plants and vitamins, 1624  
     reproductive capacity of plants, 1088

## SUBJECT INDEX

- Manual (continued)—**  
 seed production of vegetables, 340  
 (Swedish), 1099, 1625  
 shade and ornamental trees, care of, 337  
 weed control, 659
- Manures and manuring—see also particular crops—**  
 composition of various organic, 394  
 affects composition of fruit, 1248  
 citrus, 1470-1472, 1475  
 deciduous fruit, in Sweden, 392  
 green—  
     legumes for, 755  
     for raspberries, 404  
 phosphatic, in sandy soil, 1135  
 pineapple, 619, 620  
 potash, seaweed for, 393, 1104  
 raspberry, 404  
 root shape affected in carrot, 1395  
 sewage, use of, 1136  
 tea, 343, 590  
 tung seedlings, 1490  
 vegetable, 667  
     in wartime, 752
- Marasmius perniciosus* in cacao, 284, 600, 668, 1526, 1527
- Marigolds in Pennsylvania, (245)**
- Marketing—**  
 apple, 68, (69), 402  
 co-operative, of fruit and vegetables, (403)
- Markets for Argentine fruit, foreign, (770)**
- Marrows, discussion on, 519**
- Mating discrimination in plants, 684**
- Matthiola bicornis* germination, 689
- Medicinal plants—see also Drug plants and Herbs—**  
 Medicinal plant cultivation—  
     in England, 170  
     in New Zealand, 344
- Melampsora lini*, 477
- Melon—**  
 musk, breeding, 196  
 the Peruvian (*Solanum muricatum*), 344  
 pollination methods for water, 924  
 water, resistance to wilt disease, 197
- Bermein Research Station, report on work, 1063**
- Mercury, fungicidal action, (123)**
- Merodon equestris*, 1461
- Metabolism, iron-manganese relation in plant, 226**
- Metaphosphate, its use in nutrient solutions, (1138)**
- Metaphycus helvolus** parasite of black scale of citrus, 978
- Methylalyl chloride as grain fumigant, 1630**
- Methyl bromide fumigation, 558, (562), 1571, 1572**
- Michurin—**  
 apple varieties, testing, 717  
 horticultural institute, research at, 716
- Microbial surface growth, spice oils for controlling, 1614**
- Microchemistry, a review of work in 1942, 1629**
- Microfilms in libraries, 373**
- Micro-incineration to determine mineral pattern of plants, (375)**
- Micro-organisms, collection at Peoria, Ill., 1616**
- Microscope, the electron, 1629**
- Millettia ferruginea*, (578)
- Minsk research institute under German direction, 709**
- Missouri agric. Exp. Stat. A.R. 1938-39, 1095**
- Mite(s)—**  
 control of orchard and garden, (845)  
 cyclamen (*Tarsonemus pallidus*), 1289, 1459  
 Pacific (*Tetranychus pacificus*), 1287  
 red (*Paratetranychus pilosus*), control, 1097  
 red spider (*Tetranychus telarius*), 1286, 1345
- Mole destruction, 837, 838**
- Molybdenum—**  
 affects nitrogen fixation, (23)  
 response of plants to, (1138)
- Monilia cinerea* on peach and almond, 426
- Moshi, Coffee Res. Stat. Lyamungu, A.R. 1942, 1635**
- Moss-peat situation in U.S.A., (1138)**
- Moth, diamond back (*Plutella maculipennis*), rotenone-nicotine dust for, 1350**
- Mountain ash (*Sorbus aucuparia*)—**  
 a graft hybrid, 721  
 a host for *Argyresthia conjugella*, 831  
 rootstock for pear, 384
- Mulching soft fruit, 411**
- Murray Valley, viticultural trials in, 83, 84**
- Mushroom—**  
 food value, 1453  
 insects, 230  
 manual on common, edible, 1622  
 wood preservative affects growth, 1452
- Mustard—**  
 effect of sulphur deficiency on black, 494  
 oils in crucifers and clubroot, 1408  
 seed production, 493
- Myxosporium mal'i* causing canker in apple, 1274
- Myzus cerasi* control, 431
- Naphthalene, crude, for controlling cabbage, carrot and onion fly, 1405**
- $\beta$ -Naphthoxyacetic acid induces parthenocarpy, 202**
- $\beta$ -Naphthoxyacetic acid fumigation, effect on tomatoes, 522**
- Narcissus—**  
 hot water treatment, 539  
 mosaic, 540  
 pests, 1461  
 stripe disease, 954, 1460
- Natal plum (*Carissa*) in California, 987**
- Nebraska agric. Exp. Stat. A.R. 1941, 1096**
- New South Wales, deciduous fruit growing in, 1139**
- New York State hort. Soc. Proc. 88th annu. Meet. 1943, 1097**
- New Zealand—**  
 D.S.I.R. A.R.s 1941-42 and 1942-43, 344, 1633  
 horticulture in, 1107  
 rootstock nursery, 1158
- Nicotiana*  
 alkaloids in, 140, 141  
 induced heteroploids in, (893)  
*tabacum*—  
 growth hormones and fruit set in, 480  
     and other species, (1369)
- Nicotine in plants grafted on tobacco, 482**
- Nigeria, Oil Palm Res. Stat. A.R.s 1939-40, 1940-41, 1941-42, 666**
- Nitrate—**  
 absorption, (697)  
 contents of sap, 696
- Nitrates in citrus soil, toxicity, 1474**
- Nitrogen—**  
 and carbohydrates in apple trees, 53  
 content of waste materials, 394  
 fixation affected by molybdenum and vanadium, (23)
- metabolism in plants, 691**  
 from organic materials, 64
- Nodule, root, of leguminosae, 1120, 1473**
- Nomograms for soil density determination, (31)**
- Nursery(ies)—**  
 official control of fruit trees, in Sweden, 376  
 stock in England, a plea for certification, 710  
 stock propagation, 728, 1160, 1161
- Nut grass (*Cyperus rotundus*) eradication, 582**
- Nutrient—**  
 solutions, (697), (1138)  
 translocation related to root metabolism, 1117
- Nutrition—**  
 affects pollen germination, 14  
 work in 1942-43, review of mineral, 1131
- Nuts, climate and, 34**
- Nyasaland Dep. Agric. A.R. 1941, (347)**
- Oil—**  
*Cnidoscolus megacephalus*, a source of, 1017  
 deposit, determination of kerosene, 554  
 in fennel seed, volatile, (656)  
*Guanábana* seed, (656)  
 from material of recent origin, (1620)  
 olive, extraction, (1087)  
 palm—  
     improvement in Cameroons, 286  
     research station near Benin, Nigeria, 666  
 selection at Yangambi, 613  
 yield affected by—  
     layout, 615  
     varietal origin, 614
- plants—**  
*Linum*, 1376, 1377  
 poppy, 1375  
 rape, 899  
 seeds, phosphatides in, (1454)
- Oiticica nut (*Licania rigidia*) curculionid pests of, 605**
- Okra—see also *Hibiscus esculentus*—**
- Okra pod spot (*Ascochyta abelmoschi*), 1031**
- Olive—**  
 anthracnose (*Gloeosporium olivarum*), 109  
 dehydration, (1067)  
 fly (*Dacus oleae*), 1294  
 green, production of Spanish-type, 1612  
 and olive products throughout the world, 1628  
 oil extraction, (1087)  
 pickled, storage of, 327  
 propagation, vegetative, 731
- Onion—**  
 and other edible Alliums, 913  
 diseases, 860
- Ditylenchus dipsaci* in seedlings, (512)
- Ever-ready, the, 1401**
- fly (*Delia antiqua*) control, 511, 861, 1402, 1405**

## SUBJECT INDEX

- Onion (continued)**  
growing—  
in England, 912  
in New Zealand, 508, 1397  
in South Africa, 1398  
in White Russia, 1400  
manuring, 914, 1396  
mildew (*Peronospora destructor*), 915  
nitrogen nutrition, 1396  
seed—  
production in Idaho, 510  
storage, 509, 1562  
storage, 633  
varieties, American, 132  
variety trials in Scotland, 507  
vernallization, 184, 1400  
weed control, 916, 1399  
the Welsh, 1401  
**Ontario**—  
establishing a young orchard in, 747  
fruit varieties recommended for, 726  
**Oospora pustulans**, 1355  
**Opium** production in Spain, 901  
**Orange**—  
Clementine—  
cultivation, 966  
non-setting, and remedies therefor, 964, 965, 967  
rootstocks for, 965, 966  
cultivation in California, 1464  
fruit composition, rootstock effect on, 1467  
fruit drop in Valencia, 248  
graft, the Setubal-sour, 1468  
granulation of Valencia, 251  
helioine injection for disease control, 801, 802  
juice, maturity affects, 962  
Malta, sunburn in, 1476  
manuring, 1475  
nectar and pollen, bee activity and, 547  
pruning, 548, 972, 1469  
rootstocks, 965, 966, 969, 1467, 1468  
Sangria, sunburn in, 1476  
sirocco affects, 960, 961  
storage, 308, 1045, 1046  
sunburn of Malta and Sangria, 1476  
Valencia—  
cultivation, 1464  
fruit drop, 248  
vitamin C content, 963  
Washington Navel improvement, 544  
yield adjustment in experiments, 1475  
**Orchards**—  
advice on establishing, in Ontario, 747  
neglected, renovation, 748, 1179  
in Rhodesia, home, 377  
in Russia, extent of, 378  
**Orchids**, vitamins affect germination and growth, 952  
**Oriental fruit moth** (*Grapholita molesta*)  
fumigation, (451)  
**Origin** of new forms, 1102  
**Ornamental**—  
plants of Rio Grande Valley, (956)  
trees, manual on care of, 337  
**Orobanche** on economic crops, 938, (1369)  
**Osmosis**, meaning of term, 686  
von Osten apple orchard, fertilizer data from, 1183  
**Oxidation** in the endodermis, significance of, 358
- Pachyrrhizus erosus** a possible insecticide, 1328  
**Packing**—  
fruit, 769, (1067)  
peaches, 625, 1040  
**Papaw**—  
infestation by Mediterranean fruit fly, 1497  
investigations in Hawaii, 1632  
*Phytophthora parasitica* on, 265  
**Paper** possibilities in West Africa, 1505  
**Papery bark canker**, relation to silver leaf, 1273  
**Paratetranychus**—  
*citrif*, 561, (562)  
*coti*, 996  
*viridis*, 1288  
**Parsley**, vitamin C in dried, 1064  
**Parsnip** fertilizers, phosphatic, 459  
*Parthenium argentatum*, 609, 1024, 1540  
**Parthenocarpic** fruits, composition compared with that of normal, 167  
**Parthenocary**—  
induced by growth substances, 202  
natural and artificial, 13  
**Passion fruit** growing in Auckland, N.Z., 776  
*Pauridia peregrine*, mealy bug parasite, 1014  
**Pea**—  
aphid (*Macrosiphum pisi*), 1451  
calcium effect on, (1454)  
canned, green colour preservation in, 651  
damping off, 944  
dried, vitamin C content, 1064  
field, new, 534  
foot rot, 860  
frozen-pack, 301  
fungicidal seed protectant, 228, 943, 944  
grafting experiments, 941  
inoculation of canning, 1450  
nitrogen effect, (1454)  
nut, *see* Groundnut  
nutrition, rare earth in, 535  
production in Victoria, Aust., blue, 1449  
seed inoculation, 942, 946  
seed treatment, 533, 943  
varieties—  
American garden, 132  
in Tasmania, 940  
**Peach**—  
arsenic injury, (845), 1097  
blight (*Coryneum beijerinckii*), 108  
cherry yellows on, (101)  
cover crops and soil management, 667  
drying, 1061  
fruit composition, 390  
inherited characters, (45)  
juice processing, (335)  
leaf curl (*Taphrina (Exoascus) deformans*), 108, 426  
leaves, phosphatic content, 1184  
manuring, 1184, 1185  
marketing in Illinois, 768  
mealybug (*Pseudococcus comstocki*), 1292  
*Monilia cinerea* on, 426  
N, P, K relations in young, 1182  
packing, 625, 1040  
phosphatic nutrition, 1184  
pollination, part played by bees, 742  
precooling, 625  
provitamin A by processing, 321  
pruning, 756, 1190  
roots affected by pruning, 1190
- Peach (continued)**—  
rootstocks and relation to chlorides and sulphates, 1185  
shot hole (*Clasterosporium carpophilum*), 426  
storage, 625  
sulphited, preserves from, 1043  
suture spot, 806  
tree borers, ethylene dichloride for, 1303  
varieties for Pennsylvania, 1157  
wart (*Galla verrucae*), 424
- Pear**—  
blooming dates, 1174  
boron deficiency, 420  
codling moth on, 828  
cordons cultivation, 49  
cuttings, 730  
diseases in Washington State, 1278  
frameworking, 47  
phosphorus deficiency in, 1252  
pollination, 665, 1174  
polyploidy and winter hardiness, 389  
pruning the Williams, (67)  
rootstocks for, 384, 739, 1172  
seedlings, vigour in, 719  
soil moisture influences composition, 1193  
storage—  
in Australia, 1037, 1630  
gas, 305  
in New Zealand, 344, 1633  
waxed paper linings, 344  
training by "l'Arcure" method, 50  
varieties—  
Packham's Triumph, 40  
in U.S.S.R., 1151, 1152
- Peat**—  
and compost investigations at the Macaulay Institute, 368  
for propagation purposes, 368, 369
- Pecan(s)**—  
deficiency symptoms, 1249  
delayed foliation and dormancy breaking, 1232  
mites (*Eriophyes caryae* and *Paratetranychus viridis*), 1288  
topworking, 788  
transplanting, use of growth substances when, 1231
- Pectin**—  
extraction from apple pomace, 1076  
importance in jam and jelly making, (656)
- Pemphigus bursarius*, 1411
- Penicillium**—  
on citrus, effect of diphenyl in wraps on, 1046  
development on vegetable cut surfaces, 19
- Pennisetum purpureum* for compost making, 580
- Pennsylvania agric. Exp. Stat. A.R.** 1941-42, 345
- Pepper(s)**—  
bell, growth affected by insecticides in soil, 440  
(*Capsicum frutescens*) mosaic, (1032)  
parthenocarpic compared with normal fruits, 167  
photoperiod affects flower primordia development, 166  
pungency, chemical tests for, 165  
sweet (*Capsicum annuum*)—  
ascorbic acid content, 491  
as ornamental, 492

## SUBJECT INDEX

- Peradeniya Royal Botanic Gardens, (576)**  
**Periodicals from U.S.S.R. received in London, (351)**
- Peronospora—**  
*destructor*, 915  
*tabacina*, 892, (893)
- Persimmons, vitamin C in leaves and fruits, 639**
- Pest(s)—**  
 control—  
     biological, 660  
     current contributions on, 438  
 and diseases, manual, 794  
 of dried fruit, 430, 1057  
 of food plants in tropics, 271  
 of mushrooms, 230  
 resistance, breeding for, 795, 797, 798  
 rodent, of Morocco, 437  
 of root crops, 862  
 of small fruits, 116

     climate and, (131)  
     cryolite injury to seedlings, 1366

## SUBJECT INDEX

- Tobacco (continued)—  
 curly top, 1367  
 downy mildew (*Peronospora tabacina*), 892, (893)  
 excised roots, nicotine synthesis in, 481  
 Experiment station, Medan, the Deli, 588  
 frog eye (*Cercospora nicotianae*), 588  
 fumigation, 1369  
 growing in Colombia, (1553)  
 krommek virus, 484  
 manuring, (589), 986, 1365  
 mosaic, (231), (893)  
 moth, carriers affect, 1368  
 N. Zealand work, 1633  
 nicotine—  
     and nornicotine determination, (1369)  
     in plants grafted on, 482  
     synthesis in excised roots, 481  
 and other species of *Nicotiana*, (1369)  
 pests, 588  
 plantago virus in Burley, (893)  
 potassium affects quality in, 1182  
 preceding crop affects, 1365  
 research in N. Zealand, 344  
 respiration in virus-infected, (487)  
 slime disease (*Pseudomonas solanae-carum*), 588  
 soil survey in Sumatra, 588  
 stored, pests of, 1368  
 streak, 889  
 thrips (*Frankliniella fusca*), 486  
 Turkish, cultivation in S. Rhodesia, (231)  
 viruses, (231), 484, (487), (893)
- Tomato—**  
 bacterial canker (*Phytoponas michiganense*), 526  
 bacterial soft rot, 1434  
 bacterial wilt, 1435  
 big bud virus, 1433  
 blight (*Phytophthora infestans*), 936, 937, 1439  
 breeding, 216, (219), 1096  
 broomrape parasitizing, 938  
 canning, 332  
 chlorosis, 209, 1429  
 cloud disease, 1092  
 collar rot (*Alternaria solani*), resistance to, (219)  
 cross pollination, (1445)  
 cuttings, effect of growth substances on, 203  
 damping off (*Pythium* and *Rhizoctonia*), 935  
 defoliation resulting from gaseous emanations, 932  
 diseases, (219), 860  
 evolution of cultivated, 199  
 field plot technique, (1445)  
 a fruit blemish of outdoor, 1428  
 fruit composition affected by nutrition, 1419  
 fumigation, effects on plant, 522  
*Fusarium*-resistant varieties, 213  
 germination inhibitors, 689  
 grafted on *Datura stramonium*, (219)  
 gray-wall, 210  
 green, vitamin C content, 331  
 growing—  
     in England, 925  
     on the I.C.T.A. farm, Trinidad, 297  
     in Michigan, 926  
 growth substances and, 693, (697), 775, 1425
- Tomato (continued)—**  
*Heliothis armigera* damage, 1443  
 hybrid, first-generation vigour, 200, 1416  
 indolebutyric acid affects fruit set and yield, 1425  
 investigations at Cawthon, 1092  
 irrigation, (219)  
 juice from tomato paste, 1081  
 leaf—  
     spot and stem canker of seedlings (*Alternaria solani*), 214  
     miner (*Phytomyza solani*), 1444  
     mould (*Cladosporium fulvum* or *C. herbarum*), 212, (219), 662, 1440  
     light intensity possibly causes gray-wall, 210  
 manuring, 665, 1339, 1340, 1419  
 micro-element deficiencies affect, 1420  
 mosaic, influence of lime and potash on, 1431  
 nematode, breeding for resistance, 216  
 nutrient root media without effect on storage quality, 1423  
 organic matter for (219)  
 parthenocarpic induced in, 202, 1425  
 paste as source of juice, 1081  
*Phytophthora* diseases, 936, 937, 1438, 1439  
 platinum chloride influence, 208  
 pulp production, 1082  
 radioactive substances affect growth, 931  
 ring spot virus, 525  
 ripening, 665  
 roots—  
     excised, 206, (219), 693, (697), 1427  
     growth, effect on stem growth, 523  
     knot nematode, 217  
     rot (*Colletotrichum atramentarium*), 1436  
 sand culture, 207  
 seed—  
     disinfection, 218  
     extraction, 1417  
     growth substances and, 673  
     storage, 1562  
 soil sterilization, (1445)  
 spotted wilt virus, 211, 1432, 1435  
 starter solution tests, 1421, 1422  
 stem rot (*Didymella lycopersici*), 527, 1441, 1442  
 stem rot (*Phytophthora parasitica*), 1438  
 storage, 630, 665, 1423  
 tetraploidy induced by colchicine, 201  
 tip-blight virus, 1432  
 topping, 1424  
*Tree (Cyphomandra betacea)* cultivation, 571  
 varieties—  
     American, 132  
     Canadian tests, 927  
     determinate, 928  
     Early Chatham, 930  
     outdoor, in England, 521  
     Pennheart, 1415  
     resistant to wilt (*Fusarium lycopersici*), 213  
 Tatura Dwarf Globe, 929  
 Vetomold, 212  
*Verticillium* wilt, 1437  
 in vicinity of black walnut unthrifly, 1637  
 viruses, 525, 1430-1433  
 vitamin C content, 331, 1418, 1420  
 in water culture, 204, 205

- Tomato (continued)—**  
 watering of greenhouse, 524  
 weight fluctuations, 1119  
 wilt (*Fusarium lycopersici*), 213, 933, 1435  
 yield, relation of stem diameter to, 1426
- Topworking—**  
 fruit trees, 729  
 pecans, 788
- Torsions and their analysis, 8**
- Toximeter, an insect, 126**
- Training fruit trees, clamps used in, 1187**
- Translocation studies, use of radioactive phosphorus in, 355**
- Transpiration—**  
 affected by leaf hopper injury, 112  
 evaporating power of the air, 681  
 and ringing, effect on mineral uptake, 357  
 water supply during, 354
- Tree—**  
 surgery, 337  
 tomato (*Cyphomandra betacea*), 571
- Triiodobenzoic acid as growth substance, 365**
- Trilobium spp. storage pests, 1570, 1571**

## SUBJECT INDEX

- Vascular tissues in seed plants, origin and growth, 683
- Vegetable(s)—**
- blanching, 325, 326
  - canning, 325, 326, 1071, 1630
  - composition of Ceylon, 587
  - crops—
    - boron content, 855
    - climate and, 130
    - deficiency symptoms, 799, 800
    - essential food production of different, 1332, 1333
  - cut surfaces, penicillium development on, 19
  - dehydrated—
    - powdered, 1065
    - sulphuring, 1066
    - vitamin C stability in, 329
  - diseases, 179, 657, 860
  - drying, 646, 649, 1052, 1053, 1056, 1064-1066, 1592-1595, 1599-1602, (1603), 1630, 1633
  - electric hotbeds for field grown, 1341
  - fertilizers, *see* manuring
  - frozen, microscopic studies, (335)
  - glasshouse production, 458
  - growing—
    - in the allotment, (947)
    - under artificial light, 458
    - compost value in, 61
    - for continuity of supply, 453
    - in England, 847, 1330
    - under glass, 850
    - in S. Africa, 454-457
    - in United Provinces, India, 296
    - growth affected by temperature and day length, 856
    - juice composition, 323
    - lead arsenate in soil affects, 1338
    - liquid fertilizer for, 178
    - manuring, 65, 66, 667, 1334-1337
    - marrow seed production, 1413
    - pest control in N. Jersey, (463)
    - preservation by salting, 1068, 1069, 1613
    - processing at home, 1070, 1071
  - Res. Stat. Alnarp, Sweden, A.R. 1939, 1090
  - seed—
    - investigations at John Innes, 665
    - phosphates, composition, (1454)
    - production, 134-137, 340-342, 454, 455, 457, 1099, 1331, 1625
    - storage, 134
  - soil management, 852
  - storage, 1094, 1566
  - storage at home, 624, 1573
  - varieties in Sweden, 452
  - vitamin content, 319, 636, 637
  - vitamin C affected by processing, 1581, 1610
  - vitamin P content, 1583
  - weed control, 864
- Vegetative cover, relation to soil drift, (67)**
- Venezuela—**
- agricultural education and research, 574
  - agricultural experiment Station A.R. 1939, 669
- Venturia inaequalis*, 119, 444, 667, 817, 1095, 1097, 1276, 1277**
- Vernalization—**
- of lettuce, 192, 517
  - onion, 184
  - possible effect on bios components and vitamin C in plants, 15
- Verticillium* wilt—**
- of hop, 163
  - of tomato, 1437
  - vigour measurements, statistical interpretation, 1142.
- Vine—**

  - respiration and, (1265)
  - rose, 239
  - rough bark in fruit trees, 98
  - of stone fruit, 812
  - strawberry—
    - leaf roll, (101)
  - sugar beet yellows, (231)
  - tobacco, (231), 889, (893)
  - tomato, 210, 525, 1430-1433
  - transmission by insects, 100, 1433
  - vectors, (1358)
  - yellows, spread, (101)
- Vitamins—** *see also particular vitamins*
- Vitamin(s)—**
- affect growth of orchids, 952
  - affected by—
    - cooking, 636, 641-643
    - dehydration, 645
    - naphthoxyacetic acid fumigation, 522
    - salting, 1069
  - deficiencies of filamentous fungi, 17
  - in dehydrated seeds and sprouts, 1582
  - in fruits, 645, 1578
  - in fungi, 17, 18
  - plants and, a review, 1624
  - provitamin A in peaches affected by processing, 321
  - in rose hips, 638
  - in tubers, 1579
  - in vegetables, 645, 1069, 1332, 1333
- Vitamin A—**
- in carrots, fresh and dehydrated, 330
  - in vegetables, 637
- Vitamin B<sub>1</sub>—**
- in potato, 643
  - and tomato roots, excised, 693
  - in vegetables, 637
- Vitamin C—**
- Actinidia chinensis* a rich source, 70
  - addition to apple juice, 1073, (1087)
  - affected by—
    - cooking, 320
    - manuring and environment, 905
    - processing, 642
  - in Alberta diets, 320
  - in apple, 38, 39
  - in beans, 1048
  - in canned fruits and vegetables, 324, 1610
  - in dried vegetables, 1064
  - in fruits, 319, 320, 324, 636, 1577
  - in oranges, 963
  - in muscadine grapes, 86
  - in peas, frozen-pack, 301

**Vitamin C (continued)—**

in persimmon leaves and fruits, 639  
from pine needles, 703  
in plants, various factors involved, 15  
in potato, 470, 641, 642  
in rhubarb, 190  
rôle in plant nutrition, 359  
in *Rosa*, 236  
from rose hips, 236, 638, 1584  
in small fruits, stability of, 1041  
stability in dehydrated vegetables, 329  
in strawberry affected by weather, 774  
in tomato, 331, 1418  
in tomato roots excised, synthesis of, 206  
in vegetables or vegetable juice, 319, 320,  
    323, 324, 636, 637, 1581  
in walnuts, 640, 1580  
in wine, 316

**Vitamin P—**

in black currants, 322  
in fruits and vegetables, 1583

**Vitaminol from tomato pulp, 1082****Walnut—**

black—  
apple, potato and tomato unthrifty in  
    vicinity of, 1637  
evaluation of nuts, 1229  
growth measurements of seedling, 787  
grafting, 415  
hardy, the Crath, 1228  
kernels, delayed hulling affects quality,  
    1235  
planting in England, 786  
soil management, 58  
surface areas of Persian, 1230  
varieties, Crath's Carpathian, 1228  
vitamin C content, 640, 1580  
Washington agric. Exp. Stat. A.R.s 1941-42  
    and 1940-41 respectively, 671, 1098

**Waste materials, nitrogen content, 394****Water—**

absorption at low temperatures, 353

**Water (continued)—**

consumption of economic plants, (706)  
cultures—  
    fertilizers for, 395  
    pH affects success in, 204, 205  
hyacinth (*Eichornia crassipes*) in California, 835

Waterlogging affects photosynthesis in  
apple, 55

**Water—**

melon rind, processing, 1084  
relations to plant growth, 680

**supply—**

    plants and their, 1192  
    to transpiring leaves, 354

vapour, growing plants in, 27

Wax coatings, respiratory gas movement  
through, 309

**Weather effect on—**

flowering and fruit set, 743  
vitamin content in strawberries, 774

**Weed(s)—**

control—*see also* Herbicides  
    manual, 659  
    sulphuric acid for, 465, 513, 864, 1399  
    in vegetables, 864

corn marigold (*Chrysanthemum segetum*),  
    865

*Galinsoga parviflora*, 865

investigations, Australian, 1630

nutgrass (*Cyperus rotundus*), 582

Weight of plant, fluctuations in, 1119  
West Virginia agric. Exp. Stat. Rep.  
    1940-42, 1637

Willow herb, Rose bay (*Epilobium angusti-  
folium*), prevalence on bombed  
sites, 350

Wind erosiveness, measurement, (31)

**Wine(s)—**

ascorbic acid in various, 316

bibliography, 661

fruit, 317

glycerol in, (1620)

**Wine(s) (continued)**

monochloracetic acid in, (1620)  
production—  
    in Punjab, scope for, 1605  
    in South America, 1604  
    Swiss figures, 1203

**Winter—**

hardiness, polyploidy and, 389  
injury—  
    to raspberry, 422  
    to strawberry, (81)

**Wireworms, (1307), 1346****Wireworm—**

distribution in soil, 114  
in glasshouses, 145  
soil moisture relations, (947)  
washing out from soil samples, 863

Wood preservatives affect growth of  
mushrooms, 1452

Woolly aphis, *see* *Aphis*, woolly

Wraps for fruits, *see* Storage, wraps

*Xanthium*, translocation of floral stimulus  
    in, 682

Xanthone as pest control spray, 1287

*Xylaria malic*, 106

*Xyleborus fornicatus*, 591, 1514

**Yakima Valley—**

    fruit growing in, 35  
    hop growing in, 161

**Yam—**

    bean (*Pachyrhizus erosus*) as insecticide,  
        1328

    composition in Ceylon, 587

Yearbook, U.S. Dep. Agric. 1941 and 1942,  
    338, (347)

**Yeast—**

    multiplication affects apple juice, 314  
    virus inactivator from, 96

Zinc deficiency in pineapple, 295, 1632

Zwetschen cultivation, (45)
